

## Golf Ebikes – Good for Golf Courses, Golfers, and the Future of the Golf Industry

We officially introduced Golf Ebikes to the industry at the last PGA Show in Orlando. This page will highlight the benefits to golf courses, and answer some of the questions and hesitations that you might have.

Ebikes are one of the fastest growing segments in the world with millions already in the United States and growing exponentially. Because of that volume, they are one third the cost of previous single rider devices, and offer a lot more.

Safety, liability, turf impact, course revenue, pace-of-play, and ease-of-use, are all covered on our website. [GolfEbikes.com/golf-courses](http://GolfEbikes.com/golf-courses)

- The Intelligent Pedal Assist provides as much or as little exercise as the golfer wants.
- Ebikes speed up the game which can lead to more rounds sold per day.
- Ebikes attract young golfers that the industry needs for long term survival.
- Older golfers are attracted to the much-needed exercise and will play more often.
- Ebikes attract new revenue, and do NOT take away from cart income because most ebike riders are otherwise walkers.
- Ebikes are easy to ride and safe with dual disk brakes and soft tires that easily ride over rocks and cart path edges. They don't slip on wet slopes.
- If needed, we provide liability waivers that ebike riders are very willing to sign.

Ebikes are a world-wide growth phenomenon that forward-thinking golf courses can take advantage of.

### **Play Faster - Have More Fun** *Get As Much Exercise As You Want*

*"Balance with the bag on the side is automatic...you can't even tell it is there."*

**7 Levels of Intelligent Pedal Assist** sense how much motor help you want. Or, you can use all throttle and ride it like a scooter without pedaling.

**The Bag Carrier becomes a rock-solid kick stand that locks the bike to the ground.**

We have surveyed thousands of golfers asking, "Would you rent an ebike if they were available at your local golf course?" Almost everyone replies with, "Definitely Yes!"

We hope you will consider ebikes for your rental fleet. But even if you are not ready to offer rental bikes, we hope you will welcome golfer-owned ebikes. We would love to promote your course as an ebike-friendly golf course. It doesn't have to be a permanent decision. You can conduct an experiment for a month or a year to see the revenue and safety for yourself.

I invite you to visit [GolfEbikes.com/golf-courses](http://GolfEbikes.com/golf-courses) for more information and FAQ's. And please feel free to call me any time up until 10 pm Eastern.
