

# GOLF EBIKE RIDING INSTRUCTIONS – REQUIRED

**Liability and Responsibility** — *I accept full responsibility for the safe operation of this ebike. I agree to follow the course rules. I agree that I am responsible for any damage to the ebike or property or person, and I agree to reimburse the course for any cost of repairs from damage that I may cause. My agreement applies equally to future ebike rentals.*

Turn the battery key to the ON position which is all the way to the right.

Long-Press the On/Off button to light up the Display

The Pedal Assist (PAS) will be in 0 mode which is pedal only. Advance it to PAS-1 by pressing the + button once. You can now use the thumb throttle beside the right grip, and/or the pedals. The motor will “assist” you. You can advance the assist levels as you get used to the bike, but start off in 1 or 2. You can change PAS at any time, even while not actively riding.

The throttle is not limited to the PAS setting. In other words, you can accelerate to full speed at any time.

DO NOT ride through puddles or standing water.

BRAKING shuts off the power. Use the rear (right) brake primarily. DO NOT use the front (left) brake on loose gravel. Go slow down hills.

Always take off with your left foot on the pedal to avoid running the bag carrier into your heel.

The bike has 7 gear speeds. You can gear down for slow speeds and hills, and gear up for longer rides.

**NEVER SHIFT** unless you are pedaling. Do not shift while sitting, coasting, or throttle-only. You must be pedaling. We recommend 3<sup>rd</sup> or 4<sup>th</sup> gear most of the time.

Enter and exit raised cart paths at right angles. DO NOT enter or exit the right side of cart paths at a slight angle as the tires can drop down and cause the bottom of the Bag Carrier to hit the path. Exiting at right angles will prevent that.

Lean the Bag Carrier **ALL THE WAY OUT** into the kickstand angle every time you stop. Do not lean it out partially.

On hills and slopes, park with the front tire aimed uphill

When you stand the bike up, let the Bag Carrier pivot back to the upright carry position gently with your right hand on the top of your bag.

*I have read every word on this page. I agree to my Liability and Responsibility, and I agree to operate the ebike safely.*
