

EBIKE RIDING INSTRUCTIONS – REQUIRED

Liability and Responsibility — *By renting this ebike, I accept full responsibility for its safe operation. I agree to follow the course rules. I agree that I am responsible for any damage to the ebike or property or person, and I agree to reimburse the course for any cost of repairs from damage that I may cause.*

Turn the battery key to the ON position which is to the right.

Press the On/Off button to light up the Display

The Pedal Assist (PAS) will be in 0 mode which is pedal only. Advance it to PAS-1 by pressing the + button once. You can now use the thumb throttle beside the right grip, and/or the pedals. The motor will “assist” you. You can advance the assist levels as you get used to the bike.

The throttle is limited by the PAS setting. In other words, you don’t have FULL throttle available unless the PAS is in the highest setting.

DO NOT ride through puddles or standing water.

Always use power and speed safely.

The bike has 7 gear speeds. You can gear down for slow speeds and hills, and gear up for longer rides.

NEVER SHIFT unless you are pedaling. Do not shift while sitting, coasting, or throttle-only. You must be pedaling. We recommend 3rd or 4th gear most of the time.

NEVER take off with your left foot on the ground to avoid the bag carrier from hitting your heel

BRAKING shuts off the power. Use the rear (right) brake primarily. **DO NOT** use the front (left) brake on loose gravel. Go slow down hills.

Enter and exit raised cart paths at right angles. **DO NOT** exit the right side of cart paths in such a way that the rear tire drops down and causes the bottom of the Bag Carrier to hit the path. Exiting at right angles will prevent that.

Lean the Bag Carrier **ALL THE WAY OUT** into the kickstand angle every time you stop. Do not lean it out partially.

I have read every word on this page. I agree to my Liability and Responsibility, and I agree to operate the ebike safely.
